

IndoorPlus+ SmartCare

Lead Digital Transformation in Hospitals

Hospitals face constant pressure to improve efficiency, care quality, and patient experience amid a global staff shortage. Implement IndoorPlus+ SmartCare to boost medical staff productivity and streamline operations, addressing critical hospital challenges.

We empower healthcare providers to enhance hospital operational efficiency and elevate patient experience

Location-based Services

- Asset Tracking
- Patient Tracking
- Outpatient Flow Optimization
- Way Finding
- Entrance Monitoring

Sensor-Centric Services

- Remote Patient Monitoring
- Cold Chain Monitoring
- Medical Device Monitoring
- Vital Check Automatic EMR Transferring

Clinical Business Operations

- Asset Management
- AI-based MRI Reservation
- Bedsore intervention
- Fall-off intervention
- Inpatient Pain Management

IndoorPlus+ is a smart software platform delivering transformative results by converting location and sensor data collected from IoT devices into actionable data insights.

- ✓ **User-friendly** : Simple custom interface that makes the data accessible to all users (managers, medical staff...).
- ✓ **Simple and non-invasive** technology, leveraging existing network installations.
- ✓ **Quick set-up** : Plug and play! Easy integration into existing systems.
- ✓ **High Scalability** : Start small, gain confidence, scale up!
- ✓ **Sensor-agnostic** : Can be integrated with every device on the market.
- ✓ **Accessibility** : Available on workstation and mobile devices

Spreading value across all stakeholders

Management

- **Enhance workflows** based on immediate data insights and historical records
- **Streamline patient safety** management
- **Optimize asset utilization**
- **Mitigate medication loss** from cold chain oversights
- **Prevent equipment loss**
- **Remain compliant** with relevant regulatory safety and security requirements

Medical staff

- **Save time** on searching for assets > Allocate more time on value-added patient care
- **Record data automatically** to avoid oversights, errors and additional workload
- **Get instant alerts** in case of abnormal situation to ensure immediate response
- **Track patients** within the facility to avoid accidents
- **Monitor patient remotely** in real-time

Patients

- **Get customized treatment** through continuous acquisition of patient-specific data
- **Quicker response** to SOS
- **Ease of navigation** within the facility
- **Shorter waiting times**
- **Increased number of patients served**
- **Enhanced patient room environment**
